

Customs and Border Control

Checking all travelers for concealed contraband

Stand-off people-screening technology to strengthen customs and border control and to detect concealed contraband.

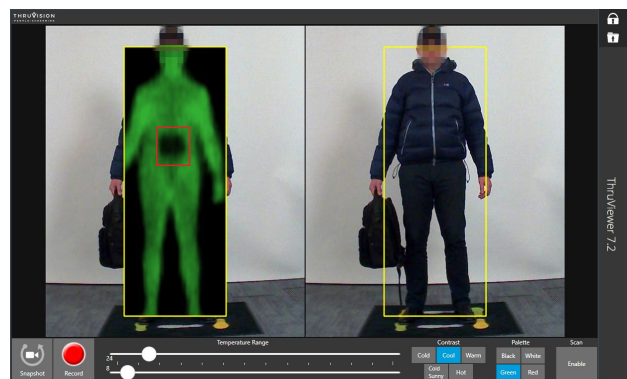

Thruvision is a proven people-screening camera able to detect any type of object hidden under clothing. Based on patented, passive terahertz technology, Thruvision provides a fast, safe and operationally proven way to screen travelers for contraband and other prohibited items at customs check points.

How can I use Thruvision to improve my customs screening?

- Screening time of 8 seconds per person
- Full-body screening with no blind spots
- Detects all types of material, and objects as small as 5cm x 5cm
- Easy to see size, shape and location of concealment
- No physical search of person needed
- Compact size allows flexible deployment

Metal detectors are ineffective against a wide range of contraband items

- ▼ Narcotics
- ▼ Cash
- ▼ Prohibited foodstuffs
- ▼ High-value items
- ▼ Weapons

Thruvision allows users to see items hidden under clothing

Screening 100% of travelers possible

100% detection rate of concealed items*

Safe and respectful for both travelers and staff

Mobile and fixed checkpoints for extra deterrence

CASE STUDY - Leading Asian customs agency's operational experience

Forty Thruvision cameras deployed in dual-lane configuration at all major land, sea and air ports of entry

Thruvision blind performance tests consistently deliver 100% success rates for concealed items as small as 5cm x 5cm

All inbound visitors screened with no disruption to throughput rate and significant contraband seizures

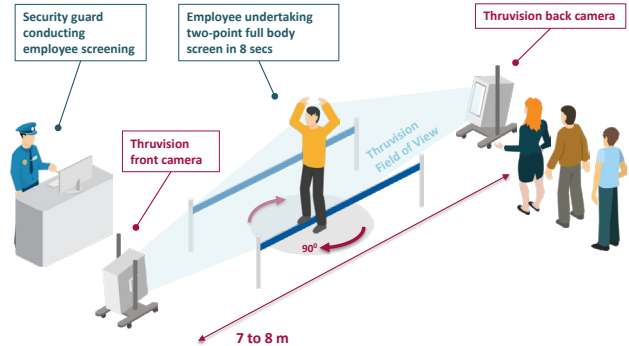

*Results reported by an Asian customs agency
