

Enhancing Entrance Security

Safely detects non-metallic weapons and reduces queues

Stand-off people-screening technology that works with walk-through metal detectors to provide additional protection and higher visitor throughput.

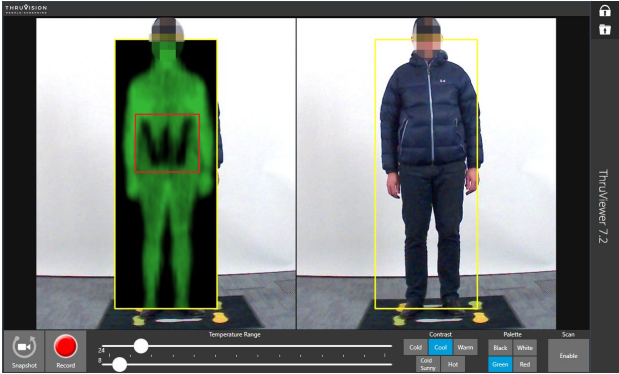

Thruvision is a proven people-screening camera able to detect any type of object hidden under clothing. Based on patented, passive terahertz technology, Thruvision provides safe and respectful real-time imagery of items that visitors have not divested, allowing guards to visualize threats and resolve metal detector alarms without needing to physically search visitors.

Why should I use Thruvision to enhance my security screening?

- Non-metallic weapons as small as 5cm x 5cm detected
- Shows possible cause of metal detector alarms
- No manual search of visitor is necessary
- Reduced end-to-end screening time per visitor
- Visitors treated in safe, respectful way
- Compact size allows flexible deployment

Thruvision detects non-metallic weapons such as

- ▼ Plastic explosive
- ▼ 3D printed guns
- ▼ Ceramic knives
- ▼ Corrosive liquids
- ▼ Non-metallic clubs
- ▼ Glass / plexiglass shards

Thruvision allows guards to see non-metallic pipe-bomb cluster concealed under clothing

Security enhanced to cover non-metallic weapons

Faster visitor throughput and shorter queues

Improved security guard awareness and safety

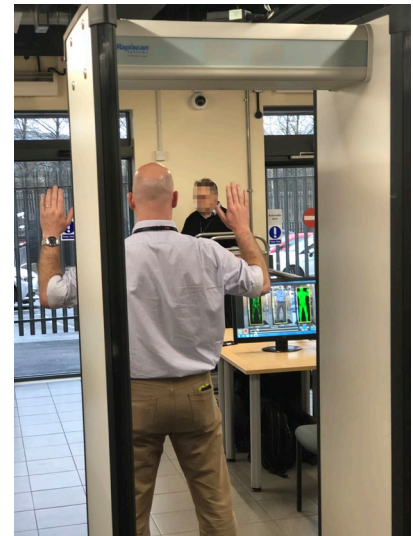

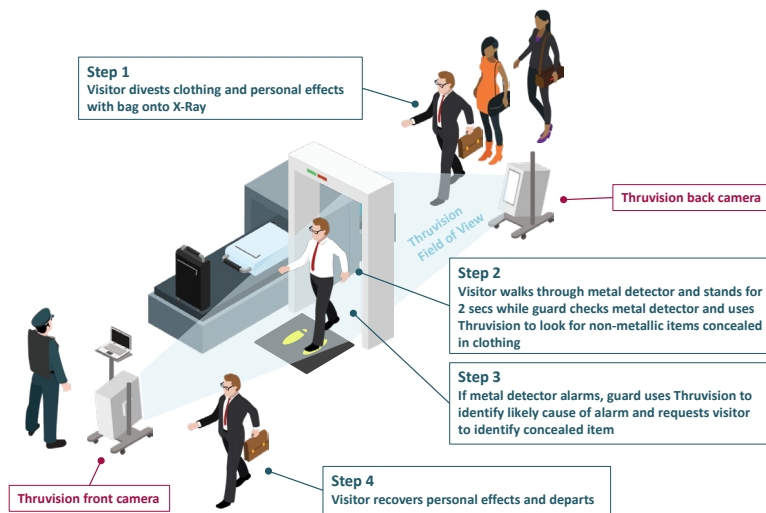

No change to existing security set-up needed

CASE STUDY - Very high-profile London building operational statistics show ...

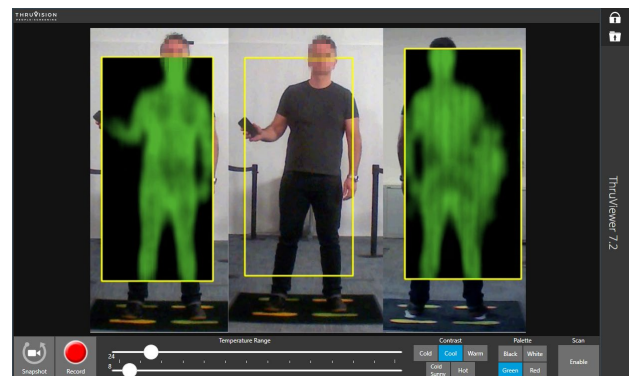

3% of all visitors had undivested non-metallic items in clothing which Thruvision detected	95% of metal detector alarms were successfully resolved using Thruvision without requiring physical search	Thruvision 'virtual search' took under 10 secs compared to physical search taking 25 secs
