

Thruvision will sponsor Retail Risk Leicester and Fraud Awards 2019

Oxfordshire, England. – July 11, 2019 – Thruvision, the leading provider of next-generation people-screening solutions for loss prevention and other applications, will be proudly sponsoring Retail Risk Leicester and the Fraud Awards on 3rd October 2019.

Thruvision will be demonstrating their people-screening solution which uses patented passive terahertz imaging technology to address the growing need for safe, fast and effective detection of items hidden in clothing. Unlike metal detectors, which cannot detect non-metallic or low metal content materials, Thruvision cameras can detect any type of item, and, unlike airport body scanners, do not reveal anatomical details and emit no energy or radiation.

In real world customer loss prevention environments, Thruvision cameras detect concealed high and low value items including: electronics, liquids, clothing, accessories, tobacco, books / paper documentation, pharmaceutical drugs / medications, cosmetics and plastics such as toys. Staff can be screened in under 10 seconds per person with no need for physical search.

Thruvision were the proud winners of “Best Newcomer” in the 2018 Fraud Awards in recognition of their immediate impact in helping to reduce losses at leading branded goods providers, retailers and distribution companies like Sony, Next, Tesco and Hermes.

Alex Brundle, Vice President of Profit Protection Sales said “Retail Risk events a great opportunity for us to network and share successes with our retail partners and colleagues. We are looking forward to the results of this year’s Fraud Awards.”

About Thruvision

Thruvision is the leading provider of next-generation people-screening technology. Using patented passive terahertz technology, Thruvision is uniquely capable of detecting metallic and non-metallic threats including weapons, explosives and contraband items that are hidden under clothing at distances up to 10m. Addressing the growing need for fast, safe and effective security, Thruvision has been vetted and approved by the US Transportation Security Administration. More than 250 units have been deployed worldwide over the last five years for applications including mass transit and aviation security, facilities and public area protection, customs and border control and supply chain loss prevention. Thruvision has offices near Oxford, England and in Washington DC.
