

## **Thruvision Shortlisted for Most Innovative Distribution Supply Chain Solution in 2019 Retail Risk Fraud Awards**

Oxfordshire, England. – August 14, 2019 – Thruvision, the leading provider of next-generation people screening solutions for loss prevention and other applications, today announce that they have been shortlisted at the prestigious UK Fraud Awards, due to take place in Leicester on 3rd October 2019.

The Fraud Awards, organised annually by Retail Risk, will this year include eight award categories, across the retail space. Thruvision are proud to be shortlisted twice in the category of Most Innovative Distribution Supply Chain Solution.

Alex Brundle, Thruvision Vice President of Profit Protection Sales said “We are delighted to receive this recognition for all of our hard work and we’re very much looking forward to the big night. We wish all the other nominees the best of luck and I hope that this event will continue to inspire organisations and individuals in retail to do even better.”

“Providing both national and international recognition for those nominated, shortlisted and ultimately chosen by our independent panel of judges, the Fraud Awards 2019... celebrates the best in our profession.” Paul Bessant, Retail Risk.

The Fraud Awards will follow the Retail Risk Leicester conference taking place on the same day, where delegates will have the opportunity to see Thruvision cameras in action.

In real world customer loss prevention environments, Thruvision cameras detect concealed high and low value items including: electronics, liquids, clothing, accessories, tobacco, books / paper documentation, pharmaceutical drugs / medications, cosmetics and plastics such as toys. Staff can be screened in under 10 seconds per person with no need for physical search.

### **About Thruvision**

Thruvision is the leading provider of next-generation people-screening technology. Using patented passive terahertz technology, Thruvision is uniquely capable of detecting metallic and non-metallic threats including weapons, explosives and contraband items that are hidden under clothing at distances up to 10m. Addressing the growing need for fast, safe and effective security, Thruvision has been vetted and approved by the U.S. Transportation Security Administration. More than 200 units have been deployed worldwide in 19 countries over the last five years for applications including mass transit and aviation security, facilities and public area protection, customs, and border control and supply chain loss prevention. Thruvision has offices in Oxford, Washington DC and Sydney.
